Currently the account balance of ACC-2002 is 8850 and there are no funds are on hold

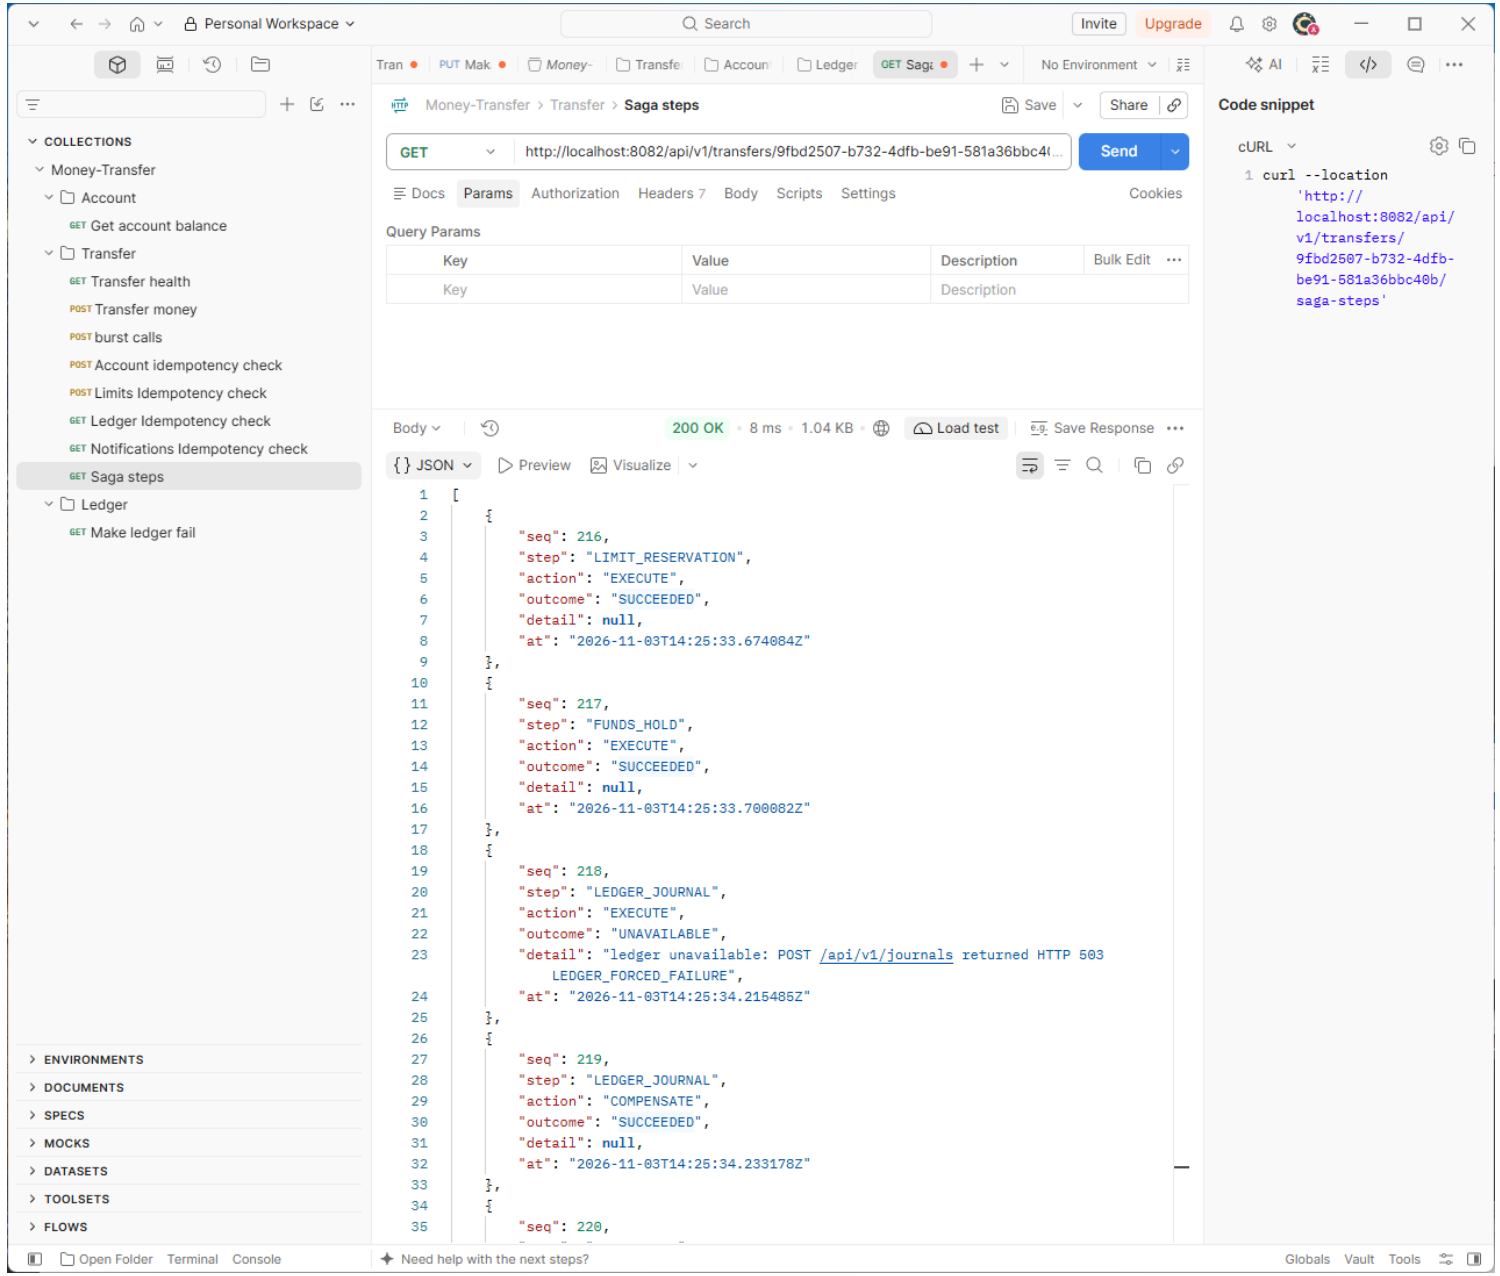

We make the ledger step fail now

If we try to transfer money now it will fail at that step, but before that step there should have been a hold placed, lets see if its still there or compensated and released.

As we can see no funds are on hold and the hold step was compensated.

We can see the step by step execution, and then compensation.
